

# My Rose of Old Kentucky

*Common Key: B*

                  B                  E  
She bloomed for me near a little village

          B                  F#  
In a cabin on the hill

                  B                  E  
We made our vows we'd love each other

          B          F#          B  
And I know we always will

                  E                  B  
She's my rose of old Kentucky

                  B                                  F#  
I watched her bloom as the years roll by

                                  B          E  
And to me there'll never be another

                  B  F#          B  
I'll love her 'til the day I die

          B                  E  
Oh in dreams I see my darling

                  B                                  F#  
In a gingham dress she looks so sweet

          B                  E  
Oh I long for old Kentucky

                  B          F#          B  
And my darling was more to me

          B                  E  
Oh I know you often wonder

          B                                  F#  
So I'll tell you the reason why

                  B                  E  
She's my rose of old Kentucky

          B          F#          B  
And I know she'll never lie
